COPIES TO: Ms Fayola Wright, US EPA

AMLAND
Meeting Notes
October 26, 1993

IDEM staff met with Chrysler and Rockwell representatives to discuss the applicability of a RCRA Post-Closure Permit for the closed surface impoundment located at the Amland facility in Mishawaka, Indiana.

Facility representatives stated that the closed surface impoundment was not used subsequent to November, 1980 and, therefore, is not subject to the requirements of a RCRA Post-Closure Permit. Staff, however, cited that the submittal of a Part-A Application, closure of the unit under interim status, as well as, post-closure monitoring and maintenance activities under an approved post-closure care plan, demonstrate the relevance of the RCRA program.

Although no agreement was reached, facility representatives stated they would submit (within two weeks) a proposal for complying with the issues of the May 20, 1992 Permit NOD.
